-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-14 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

**Priority under 35 U.S.C. §§ 119 and 120**

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 4.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

### DETAILED ACTION

This application has been examined. The claims 1-14 are pending. The examination results are as following.

#### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2, 6, 8-9 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishimoto (US patent 6,046,732) in view of Roylance (US patent 6,198,474).

Regarding claims 1-2 and 8-9, Nishimoto discloses in figure 1 that a mobile device (1) comprising a vertical oriented handheld housing and device keys mounted on the housing, the device keys (4) corresponding to personal computer keys mounted on a horizontally oriented keyboard of a personal computer and a plurality of row of personal computer keys mounted on the keyboard is divided into at least two groups; a first group of device keys (1, 2, 3) corresponding to a first group of personal computer keys is positioned horizontally on the housing; and a second group of device keys (4, 5, 6) corresponding to a second group of personal computer keys is positioned horizontally on the housing. However, Nishimoto does not disclose a second group of device keys shifted in a vertical direction of the housing with respect to the first group of device keys, or the second group of device keys is shifted horizontally on the housing with respected to the

Art Unit: 2674

first group of device keys. Roylance discloses in figure 3, a keyboard apparatus comprising two groups data entry keys, a first group are (Q, W, E, R, T, Y, U, I, O and >), a second group are (A, S, D, F, G, H, J, K, L and \*), the first and the second group is positioned horizontally on the housing of keyboard and shifted in vertical direction of the housing of the keyboard with respect to the first group. It would have been obvious to one of ordinary skill in the art at the time the invention was made to implement the comprising two groups data entry keys, and shifted in vertical direction of the housing of the keyboard with respect to each other group as taught by Roylance into the mobile device of Nishimoto because this would help the user to know the positions of the desired keys are located in the keyboard, and therefore easily enter character enter by the fingers. Regarding claims 6 and 13, Nishimoto discloses wherein a group of device keys corresponding to a part of a first row of computer keyboard (1, 2, 3) are separated on the housing by a first spacing, and the group of device keys corresponding to the other part of the first row of personal computer keys of the personal computer keyboard is separated from a group corresponding to a part of a second row of personal computer keys (4, 5, 6) of the personal computer keyboard by a second spacing (see figure 1).

5. Claims 3-4, 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishimoto (US patent 6,046,732) in view of Roylance. (US patent 6,198,474) as applied to claims 1 and 8, and in view of Whitcroft (WO 98/19227 cited by Applicant).

Nishimoto discloses in figure 1 that a mobile device (1) comprising a vertical oriented handheld housing and device keys mounted on the housing, the device keys (4)

corresponding to personal computer keys mounted on a horizontally oriented keyboard of a personal computer and a plurality of row of personal computer keys mounted on the keyboard. Roylance discloses a keyboard apparatus comprising two groups data entry keys are shifted in vertical direction. However, Nishimoto and Roylance do not disclose a color of the first group of device keys is different from a color of the second group of device keys, or a color of row of device keys in the first group and the second group is different from a color of an other row of device keys in the first group and the second group. Whitcroft discloses a data entry device includes the keys of keypad may configured as an array are arranged in rows and columns, and also arranged such that each row (or group or rows) forms a key-zone, each zone is different color (see page 17, lines 3-7). It would have been obvious to one of ordinary skill in the art at the time the invention was made to implement each row (or group or rows) forms a key-zone, each zone is different color as taught by Whitcroft into the computer keyboard having function groups of Nishimoto and Kambayashi et al. because this would be indicated with each zone having different color for designating to the user and which finger is to be used for each zone (see page 17, lines 8-9 and see page 27, claim 21).

6. Claims 5, 7, 12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishimoto (US patent 6,046,723) and Roylance (US patent 6,198,474) as applied to claims 1 and 8, and in view of Kono (US patent 5,914,707).

Nishimoto discloses a screen of a liquid crystal display panel input means (2, see figure 2); and associating the device key images formed at the predetermined positions on the liquid crystal display pane input means with a plurality of device keys on the housing

Art Unit: 2674

(see figure 1). Roylance disclose the first group is shifted vertical to the second group.

However, Nishimoto and Roylance do not disclose the devices keys on the housing are formed by touch-sensitive liquid crystal display panel input means, and the keyboard of mobile device having the second spacing is greater than the first spacing.

Regarding claims 5 and 12, Kono disclose in figure 10, a portable apparatus having a plurality of keys, wherein LCD display comprises an (26) overlying transparent touch key panel to provide a series of display icons 63,64,65. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a transparent touch panel as taught by Kono into the surface of the liquid crystal display panel of Nishimoto and Roylance because this would be activated of these displayed icons and permit the user to receive additional relevant data related to currently displayed data (see column 7, lines 6-12).

Regarding claims 7 and 14, it would have been obvious for Nishimoto and Roylance's system to have the second spacing is greater than the first spacing as claimed since such a modification would have involved a mere change in the size/range of a system. A change in size/range is generally recognized as being within the level of ordinary skill in the art.

See In re Rose, 105 USPQ 237 (CCPA 1995) and

See In re Reven, 156 USPQ 679 (CCPA 1968).
